TECHNICAL PROJECTS

StreamSeek - [GitHub](#) | [App](#) - MERN Stack | TMDB API | CSS | AuthO

A platform offering a real-time exploration of trending movies or shows. Users can search their favorite movies or shows.

- Enabled CRUD functionality on the user's profile page and implemented a comprehensive database to effectively store a user's favorite movie or show.
- Implemented AuthO Authentication to enhance user security and curated a personalized favorites list for enhanced user experience.

Allstar analytics - [GitHub](#) | [App](#) - React.js | Rapid API (MLB data) | Tailwind CSS

An app providing users the ability to access career statistics of their favorite MLB players and team rosters, by year.

- Incorporated multiple API endpoints for users to access numerous variations of MLB data.
- Integrated React routing to seamlessly redirect users to distinct show pages, showcasing relevant data results.

BeatBuddy - [GitHub](#) | [App](#) - MEN stack | CSS | OAuth | Last_FM API

A music playlist app that allows users to seamlessly search, stream, and save their favorite songs to their own user profile.

- Lead the way in a team of three other developers in successfully integrating Last_Fm API for core functionality.
- Implemented and tested functionality of RESTful routes to successfully route and reroute users to proper show pages.
